

Rock-paper-scissors and ... ZOMBIES !!!

Rules of the game

The game is designed for 2-3 players. (You would try play for 4 players too ;))

In the game uses 57 cards. 9 Brains cards, 11 cards of Rock, 11 cards of Scissors, 11 cards of Paper and 15 Zombie cards.

At the beginning of the game players get Brain cards (3 cards when 2 players and 2 cards if 3 players). The remaining Brain cards are added to the overall deck of cards, then they are shuffled and lie face down.

Players take one card in a specified order one after the other (you may use rock-scissors-paper), lay down beside him and revealing look at the result:

1. If the cards fall "Rock", "Scissors" or "Paper", the player with the card wins, takes it yourself (it will be "Trophy") to stock. If the card falls equal Trophies (when playing 2 players), the players take another card and determine the winner, who takes this card (the "Trophy") to stock. Rock rebates Scissors, Scissors cut paper, paper wraps Rock.
2. When you playing 3 players, would be the following situations:
 - 2.1. Rock-Paper-Scissors (no one wins because Trophies eliminated);
 - 2.2. Rock-Rock-Paper - Card takes the player from the Paper;
 - 2.3 Rock-Scissors-Scissors - Card takes the player with the Rock;
 - 2.4 Scissors-Paper-Scissors. - Players with Scissors take on new cards and play against each other;
 - 2.5 Rock-Scissors-Rock - Rock of players take on the new cards and play against each other;
 - 2.6. Paper-Paper-Scissors - Win the player with the Scissors.
3. If you got a Zombie card from an opponent, the player can:
 - 3.1. Zombie kills his fallen card Trophy - Scissors or Rock
 - 3.2. Use the Trophy card from your stock (Scissors or Rock) and kills zombies. Paper can't kill Zombie!
 - 3.3. If there is nothing to kill Zombies, the player loses one Brains Card and Zombies goes to discard.

With the game three players, the player may have to kill or one or two Zombies.

4. If the cards fall Zombies players simultaneously, they must either kill them or lose Brain card!
5. Players can use the Trophie card and a get of ordinary cards (not Zombie), preventing other players receive their trophies. In this case, all the cards are in the discard! For example, the Player 1 Rock card fell, and the Player 2 - Paper card. Player 1 uses the Scissors card from their Trophies stock and all the cards are in discard.
6. If you got a Brain card:
 - 6.1 If the Brain card falls simultaneously with the Trophy, the player can take the card itself and another player or the players takes the Trophy. The player can stop taking the Trophy.
 - 6.2. If the cards falls to the Brain together with Zombies, the player can kill Zombies by donating corresponding Trophy from his stock and pick the Brain card. Otherwise Zombie eats Brain card.

The winner is determined after all the cards played or have eaten brains of one (two in the game three) players.

The winner is the surviving player with the most cards of Trophies. With an equal number of Trophies won by the player who has more Brain cards left.
